Maximum Reach for Critical Connections

Sibongile Toure | Vincent Thompson
Collins Westnedge | Nick Wilders

INTRODUCTION

how we help you

- **MOTIVATION**

- *Critical Connection . . .*

to promote awareness and opportunities for
women in tech

INTRODUCTION

how we help you

- **MOTIVATION**

- *Critical Connection . . .*

to promote awareness and opportunities for
women in tech

- **OBJECTIVE**

- *Maximum Reach . . .*

to maximize your resources by **targeting
high volume areas**

INTRODUCTION

how we help you

- **MOTIVATION**

- *Critical Connection . . .*

to promote awareness and opportunities for
women in tech

- **OBJECTIVE**

- *Maximum Reach . . .*

to maximize your resources by **targeting high volume areas**

- **GOALS**

- *Effective Engagement . . .*

to increase your impact on **previously non-connected communities**

METHODOLOGY

| how we did it

Data:

MTA Turnstile data (September 2017, 2018, 2019)

- Omit Long Island, Westchester, New Jersey, Staten Island

MTA Station geographical data

NYC borough data (GeoPy plugin)

METHODOLOGY

| how we did it

Data:

MTA Turnstile data (September 2017, 2018, 2019)

- Omit Long Island, Westchester, New Jersey, Staten Island

MTA Station geographical data

NYC borough data (GeoPy plugin)

Metrics:

MTA Turnstile entries

vs

MTA Turnstile exits

MTA Turnstile turns

vs

Geographic distribution

METHODOLOGY

| how we did it

Data:

MTA Turnstile data (September 2017, 2018, 2019)

- Omit Long Island, Westchester, New Jersey, Staten Island

MTA Station geographical data

NYC borough data (GeoPy plugin)

Metrics:

MTA Turnstile time of day

MTA Turnstile turns

vs

Geographic distribution

Tools:

Python (pandas, numpy) - *data manipulation*

Plotly, matplotlib - *visuals*

GeoPy - *address / borough data*

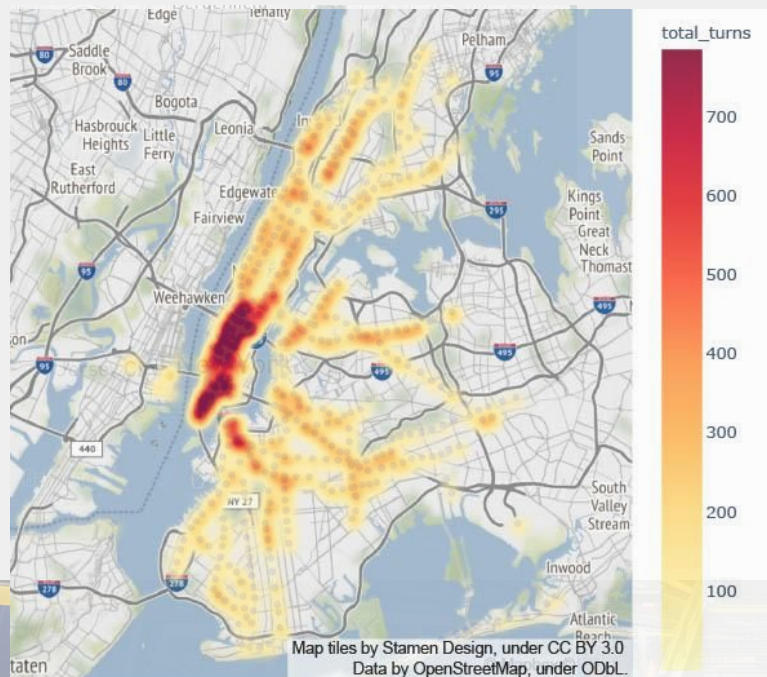

RESULTS

Subway System Reach

- **Blue Dot == Stations**
 - MTA stations designated by *unique turnstiles*
 - Represents boundaries of reach within MTA subway system
- **468 unique locations** in data set
 - \approx 460 represented here

RESULTS

Heat Map

- **Highest Concentration == Manhattan**
 - Contingent on midtown transportation hubs
 - 42nd St, 34th St-Penn Station, 14th St
- **Borough Concentrations == Everywhere**
 - Transportation hubs for each borough, in addition to NJ PATH stations
 - Other *hot* areas:
 - Brooklyn - Downtown Brooklyn , Dumbo, Williamsburg
 - Queens - Flushing

RESULTS

Total Turnstile Turns Per Station

Manhattan :

Y-axis range =
(0, 1,600,000)

Queens :

Y-axis range =
(0, 700,000)

Brooklyn :

Y-axis range =
(0, 400,000)

Bronx :

Y-axis range =
(0, 200,000)

X-Axis =
of turnstiles

Y-Axis =
turnstile turns

Point = station

RESULTS

Total Turnstile Turns Per Station

Manhattan :

Y-axis range =
(0, 1,600,000)

Queens :

Y-axis range =
(0, 700,000)

Brooklyn :

Y-axis range =
(0, 400,000)

Bronx :

Y-axis range =
(0, 200,000)

RESULTS

Busiest Stations by Borough

Manhattan

42nd St-Grand Central Station
34th St-Herald Square
34th St-Penn Station (8th Avenue Line)
42nd St-Port Authority
14th St-Union Square
42nd St-Times Square
Fulton St
59 St-Columbus Circle
34 St-Penn Station (7th Avenue Line)
47th-50th St-Rockefeller Center
Canal St

Brooklyn

Atlantic Av-Barclays Center
Jay St-Metrotech
Bedford Ave
Borough Hall
Crown Heights-Utica Ave
Kings Highway
Myrtle-Wyckoff
Church Ave
Nostrand Ave
Dekalb Ave

Queens

Flushing-Main St
Jackson Heights-Roosevelt Ave
Jamaica Center
Kew Gardens
Sutphin-Archer
Junction Blvd
Forest Hills
103 St-Corona
61 St-Woodside
82 St-Jackson Hts

The Bronx

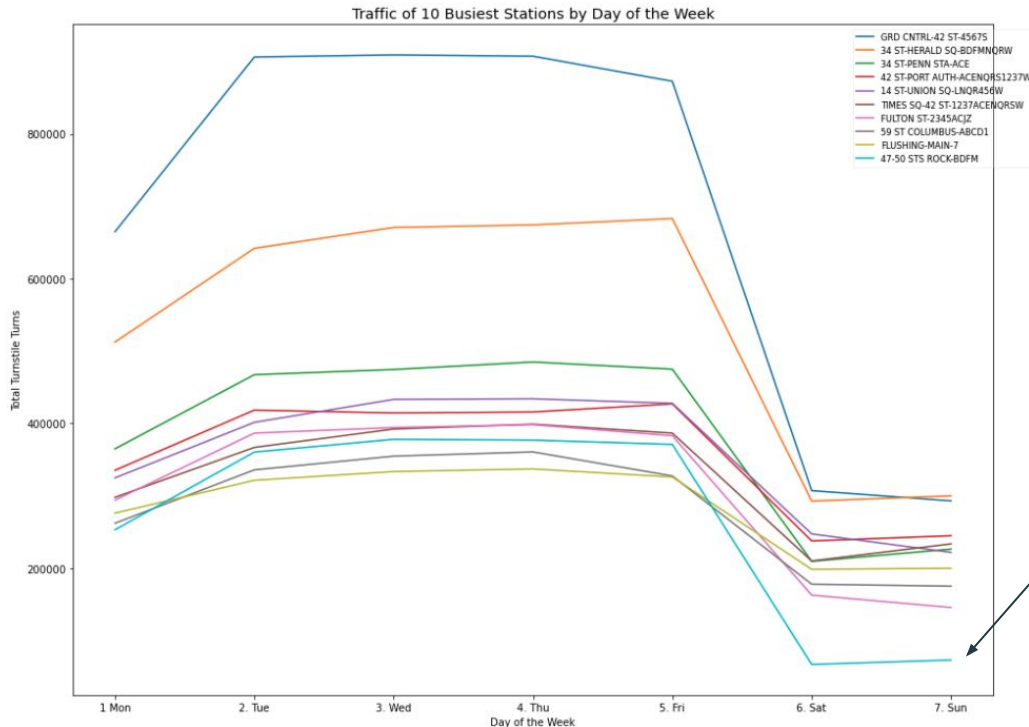

161 St-Yankee Stadium
Parkchester
3rd Ave-149 St
149th St-Grand Concourse
167th St
Hunts Point Ave
Fordham Road
Burnside Ave
Tremont Ave
Gun Hill Rd

Busiest Stations (Total Turnstile Traffic)

RESULTS

Weekday vs Weekends (NYC)

- **Less ridership on weekends**, particularly in the busiest stations, which are **commuter hubs** (Penn Station, Grand Central Station, etc.)
- **Rockefeller Center**, a corporate hotspot, stands out as a location that your street team should **only** visit on weekdays, especially if they want to reach **young professionals** as opposed to **tourists**

RESULTS

Weekday vs Weekends (Brooklyn)

- Atlantic Ave and Jay St-Metrotech are popular stations in Downtown Brooklyn, with Atlantic Ave being a good choice for event nights (Barclays Center) and Jay St-Metrotech if you wish to reach NYU's Engineering campus
- **Bedford Avenue** stands out as a great choice for **weekends**, with a far less drastic ridership drop off than comparable stations in **Brooklyn**
- Located in the heart of **Williamsburg**, it is also one of the **densest** stations - with only two entrances, you can reach all of **Bedford's** massive ridership with a relatively smaller team (even if the overcrowded L train means grumpy riders)

RESULTS

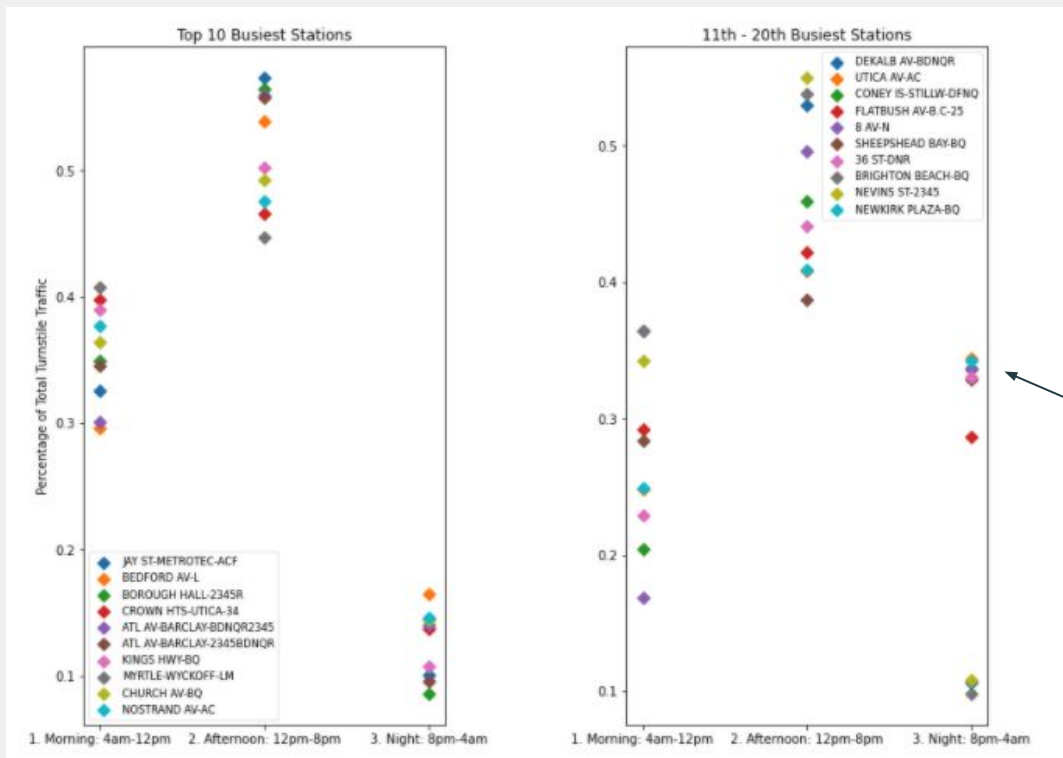

Time of Day - Manhattan

- For **Manhattan** stations, the commuter hubs have a large share of their ridership concentrated during afternoon rush hour.
- Canal Street** and **Union Square** are both popular stations in bustling areas (Soho and Flatiron district respectively), but without connections to commuter rail systems, they are comparatively **quiet in the mornings**

RESULTS

Time of Day - Brooklyn

- In **Brooklyn**, busiest stations all follow very similar patterns, with very low ridership from 8pm - 4am. If the street team is looking for active nighttime stations, they are best served looking for stations in the 11-20 range such as **Utica Ave**, **Dekalb Ave**, and **Flatbush Ave**

CONCLUSIONS

where we go now

Popular Locations:
(based on turnstiles)

Downtown

Brooklyn / Williamsburg

Stations : Atlantic Av-Barclays Center, Jay St-Metrotech, Bedford Ave

Midtown

Manhattan

Stations : 42nd St-Grand Central Station, 34th St-Herald Square

Flushing

Queens

Stations : Flushing-Main St, Jackson Heights

Suggestion:

Borough-based schedules / teams

***Maximum reach* outside population density to consistently busy stations**

CONCLUSIONS

where we go now

Time of day:

1. **Afternoon** (2pm - 8pm)
2. **Morning** (4am - 12pm)
3. **Evening** (8pm - 4am)

End-Of-Day rush hour, evening plan travels
Beginning-Of-Day Rush Hour
Late night travelers (lowest engagement)

Day of week:

Monday - Friday:
Saturday - Sunday:

Focus on **transportation hubs** / corporate areas
Focus on **residential** and **weekend** hotspots

Suggestion:

Morning shift priority (weekdays) / **Afternoon shift** (weekdays / weekends)
Effective engagement of **corporate** and **residential** populations

FUTURE WORK

| what next?

Multi-year Analysis: **Growth of tech sector** in NYC from 2015 - present

Demographics: U.S. Census - Balance high-income w/ unexposed audience
Targeting neighborhoods: based on **high average income**
 based on **low STEM engagement**
 near **colleges with STEM** programs

Residential Areas: Engaging with residential **New Yorkers** in their neighborhoods,
 promoting **long-term relationships** + **annual fund** contributions

Thank you!

APPENDIX A

Time of Day - Queens

- In Queens**, while Flushing-Main St and Jackson Heights stand out as by far the busiest stations, Forest Hills and Woodside also work for a night shift given that >30% of their traffic comes in the 8pm - 4am window
